

Vashti's Crochet Hook Charts

Traditional Standards with Missing Sizes

I show missing crochet hook sizes* among the standard US, UK, and Japanese hook sizing systems to make them easier to see. This makes a chart longer, so I've divided it into three full-size charts (one per page). The three are:

1. **All Steel Crochet Hook Sizes in 0.10 mm increments:** 0.40 mm - 3.50 mm
2. **NON-Steel Crochet Hooks (medium-range), 0.25 mm increments:** 1.75 mm - 7.75 mm
3. **NON-Steel Crochet Hooks (jumbo sizes), 1.00 mm increments:** 8.00 mm - 36.00 mm

I created these charts for my own use, originally. These are the same charts as the ones in my Nov. 17, 2018 blog post, plus I've added two more columns: one for your own notes and one for mine (the hook sizes I currently have in my shop). When I update this PDF I'll announce it in my [newsletter](#).

**The number of crochet hook sizes is technically infinite, so the ones that matter could be debated. My goals are logic and clarity. I've chosen what for me are the most logical size increments that also keep the charts easy to use.*

Note that standard size charts don't indicate where the mm. size is measured. I recommend that you ignore how brands label their hooks. Instead, use a slide gauge to measure where on each hook you form your stitches, and use the mm. column of the chart. The reason it all matters? See [the blog post](#); it determines my stitching gauge and how pretty my tall stitches are.

If you like this free reference, please tell others about it in social media with this link so they can download their own PDF. Thank you for this support—it makes a difference!

Be sure to [subscribe](#) to [Vashti's Crochet Inspirations newsletter](#) where you'll also get exclusive updates on designing partner Doris Chan.

Twenty colors of Lotus; see them at [this Lotus page](#). Mention this pattern to get a sample of all 20 colors free.
